

LOVY ARMCHAIR
HC28 COSMOPOLITAN

IN-STORE PURCHASE ONLY

LOVY designed Frank Chou

The LOVY seat is taken from the concept of a swing chair. The compact seat needs a perfect combination of the fabric and the main body, so the curved surface must fit smoothly, and the black metal chassis adds a delicate and light feeling. This design is versatile and easy to experience.

Finish: The main body is soft fabric, the base is metal black silk paint, metal copper plating feet

Cushion soft bag: The cushion is a high-elastic sponge composite, and the upper layer is filled with fluffy cotton.

Framework: The frame is solid wood and multi-layer structure, the chassis is metal
