

DS-266 RECLINER CHAIR DE SEDE

IN-STORE PURCHASE ONLY

Design Stefan Heiliger Geometric form and the simplest function. A seat suddenly turns into a comfortable recliner - DS-266 condenses more than 30 years of work by designer Stefan Heiliger into a highly individual sculpture characterized by a love of geometric forms and the simplest of functions. All it takes is a slight shift in body weight, and anyone who was just sitting upright can immediately assume a different position – the parallelogram uncompromisingly heeds your command. A masterfully crafted patchwork look gives this sculptural hybrid it's graceful rounding.

- *Featured in Leather Touch Sandstone.*

This item can be customized using a wide choice of fabrics found in the store. The Retail price will vary dependent on the fabric chosen. Pricing shown on the website is indicative of non-custom stock.
