

**CHARLOTTENBORG CHAIR
SIKA DESIGN**

IN-STORE PURCHASE ONLY

Charlottenborg chair By Arne Jacobsen Designed in 1936 and part of the Icons Collection.

About ICONS Sika Design looked to the past to some of Denmark's most skilled and important architects and designers. Collaboration with the descendants of Arne Jacobsen, Nanna and Jørgen Ditzel and Viggo Boesen ensured that significant iconic pieces were revitalised. The designers were all significant to Danish design history with their experimenting and ground-breaking designs. Each in their own way, they performed magic with the sturdy, genius qualities of the beautiful natural material of rattan and wicker. Scandinavia's oldest producer of rattan and wicker furniture, Sika Design ensured these iconic pieces went back into production staying faithful to the original designs. We are proud to present: Paris, Rana, Nanny, Madame, Fox and Wengler chair. Available exclusively to DOMO.

The history of Sika-Design

Sika-Design's history is dating back to the 1940s. Today, the 2nd and 3rd generation of the company's founder, is in charge of the company. Since 1950 Sika Design has created handmade furniture with comfort, quality and sustainability as our main requirements for the design and the manufacturing process. Our wicker furniture are handed down through generations, and world-wide several hotels, restaurants and cruise ships are furnished with furniture from Sika-Design.

2010 Sika-Design launched many new collections in this decade: Georgia Garden with romantic wicker furniture for the garden and in 2012 Sika-Design launched the "Icons" collection of wicker rattan chairs designed in the 50's by Danish architects and at the same time Sika-Design launched Affaire, which is an outdoor café furniture collection. Georgia Garden is made of strong and maintenance-free synthetic fibers woven on aluminum frames. This means that the furniture can be used exterior and will stay beautiful year after year.

About Rattan

Furniture produced of rattan, are popularly known as wicker furniture, bamboo furniture or woven furniture. Rattan is remarkable hardwearing and at the same time a very lightweight material. We often see some of our models lasting several generations. Unlike bamboo, which is a hollow material, rattan is solid. Rattan is in the palm family and grows climbing up the trees in the rainforest. About 80% of the world's rattan comes from Indonesia and it grows naturally without disturbing the existing structure and balance in the rainforest. The rattan cord can grow up to 185 meters long and there is more than 200 known species of the rattan plant. To maintain the rattan production it is necessary to preserve the trees, why the rattan plant indirectly helps care for the rain forest in Indonesia. Rattan is one of the fastest growing materials, which also filter the air and converts most CO2 to oxygen. It regenerates itself in a cycle on 5-7 years. Rattan is resistant against heat, cold, moist and temperature fluctuations, and is a sustainable material, that fulfils our production philosophy of ethics and common sense.
